Newport:

SATURDAY, OCTOBER 9 1847.

BY O. F. JACKSON, 91-THAMES ST.

- Il TWe have been permitted by a friend to make the following extract from a letter written by a gallant son of Rhode Island, an officer in Gen. Scott's army, to his family now among us. The letter from which this extract is made, it will be perceived, was not written with any belief on the part of the writer, that any portion of it would be made public; but as yet, as no official account has been published of the battles of Contreras and Chernbusco, everything in relation to them must be interesting to more or less of our citizens. It is to be hoped that this valuable son of Rhode Island survived the last sanguinary conflict in Mexico and that he is now among the living. In his life, his interesting family and numerous triends have no common or ordinary interest.

. We make the fellowing extract;

SAN ANGEL, 6 miles from Mexico, ? September 4th, 1817. As opportunity offers to send by express. by paying two dollars, I will avail myself

of it to send you a few lines. I desire to thank the Almighty that he has spared me in this last action. I have written you treely upon the subject and shall send my letters by the first mail

Gen. Scott left Puebla on the 7th of August, with about 10,000 men of all arms. We encountered the enemy in the first place at Contreras, about ten miles from the City, on the 16th, and on the morning of the 20th we stormed the Fort of Contreras; in the afternoon we carried the works of Sandiego, also a tete do Pont, in the village of Cherebusco. The result was, in about two days 6000 of the Mexicans were killed, w unded, and prisoners; and about 1100 on our side were killed and wounded. I lost 14 men killed and wounded in my company.-The Regiment (2d of Inlantry.) lost 93 killed and wounded, including two officers killed, Capt. Anderson and Lt. Easely; and six wounded,-Capt. Smith and Lt. Gardner, severely : Capt. Wessell Lieutenants Lovell, Tidden, and Hazle, slightly .-Capt. Anderson lived three days; he was shot through the fleck, wounding the spine. Capt. Smith was shot through the elbow, and also in the hip. He will save his arm but it will always be stiff. He was moved two days ago to my quarters at Pannon.

Our Regiment was in three engagements which was not the case with any other Regiment in the Army. I was much exposed. I was struck in the groin with a spent ball, hitting a pair of gloves which were in my pocket. I had my sword scabbard carried away, and the bark of a tree was thrown into my face by a grape shot. I was exposed very much the first day to shot and shell, and my company, which were out as skirmishers, were charged upon by 200 or 300 lancers. The charge was repelled by bringing down 10 of their leading men. At the taking of Contreras. I captured a stand of colors from the enemy. It belonged to the Battahon of Querester. I am to present it to General Scott for his disposal; if not so. I intended presenting it to the State of Rhode Island.

We have gained a great and glorious victory, but at a great expense of life, General Scott says he never witnessed such severe fighting sand oil the officers say that Cerro Gordo, and Monterey were nothing to it.

Col. Harney says our Regiment was under the hardest fire he ever witnessed.

SCOTT'S DEMEANOR IN BATTLE. - A COTrespondent of the New Orleans Delta thus writes of there. Scott's demeanor in battle:

Gen. Scott, at the head of our army, during the engagement received a slight' wound in the leg, and what is very remark-, able, no person whatever except himself was aware of it until after the battle was little so ordained. Yours &c. over. A great deal has been said and written in reference to the ability of Gen. Scott as a military man, but those who have not ! seen him in command and under fire ronnot form pary fort conceptions of his ship. ties. The most profile source of disease is undoubtedly impurity of blood. And to it no people are more subject than those of this country, from the plentiful and comparatively luxurious diet in the prentiturand comparatively inxurious diet in which their prosperity enables them to indulge. To parify the blood, and pohere howels from the unhealthy stateproduced by that impurity, Brown's Sarseparilla and Tomato Bitters are extremely well achieved. Sarsaparilla and Lounds Bitters are extremely on calculated: They will cradicale those impure humors which are the source of uncasiness to the system' and occasion such deformity when they make their app. arance exteriorly. The demand wake their app arance exteriorly. The demand for the above Bitters is rapidly increasing in all places where they have been sold, and there is scarcely a day passes but we have some ordered by our first physicians, for dyspepsia, indigestion, weakness of the stoumen and himbs, costiveness, general debitity, rheatmatism, &c. In fact there is not the least doubt but they are the best alternative now in use for a disordered system. The vegetables that these Bitters are mainly composed of are too well known to have the least said intheir favor. Remember in all cases when you purchase Brown's Sarsaparilla and Tomato Bitters, to see that the directions are signed by the proprietor, F. BROWN, in his hand-writing, without which none are genuine. For sale by scarcely a day passes but we have some ordered out which none are genuine. For sale by R. J. TAYLOR.

SAND'S SARSAPARILLA .- Thousands of persons are heirs of scrofula; they come, into the world with the faint in their blood, which, by the time they reach maturity, develops itself in some form or other. All such persons should keep a stock of this preparation by them, if at a distance from any town or city where it may be procured. Nor should they wait for the disease to show itself in should they wait for the disease to show itself in ulcers or cruptions but should keep it down by frequent resort to this unrivated antiseptie. The seeds of scroula, though hereditary in the blood, will not germinate while that fluid is under the influence of this powerful detergent, which if administered at intervals, will keep down the hereditary tendency through his. Miracle.

ON the 4th of August, in the year 1843, a singular scene occurred in the Royal Scientific Institution of France. The aged, white headed President, his head bare, his arms outstretched, his face radiant with smiles, (for science was triumphant,) and his voice with granulatory tone, delivered the following report:
" We are astounded at this singular preparation.

"We are astounded at this singular preparation.
Where indetal will science stop! Here we have a preparation made in the form of a heauthful piece of soap, which we know by actual practice, to cure every cutaneous crupcion, every disfigurement of, and even discolored skin! Where will its magic and singular power cease? The Negro, the Creole, the Yellow Race of the East, and the Red Man of the far West, are alike under the influence of its extraordinary powers of clearing yellows ar discolored skin, and making it white and linence of insertraordinary howers of cleaning set-low or discolored skin, and making it white and beautiful, and of changing the color of dark, or black, or brown skin." (Here several persons were brought forward by the President, who had

There are probably few persons of intelligence, who, after feading the above, will doubt the qualities of JONES' ITALIAN CHEMICAL SOAP, in curing Pimples, Blotches, Solt Rheum, Seurvy, Erysipetas, Sore Heads, Old Sores, Beard and Barber's lich, Chapped and Tender Flesh, Freekles, Tan Sunburn, and changing dark sunburn or yellow skin to a pure, clear white, as smooth and soft as an Infant's, and in fact every kind of cruption and disfigurement. Dear Sir:—You may perhaps think my statement almost incredible. My reason for fearing so is the fact of your never recommending your felly for the cure of confirmed constinution, but only in its primary or first stages. I have every reason to believe that I was in its lost stage; my reason to believe that I was in its last stage; my physician told me so; my friends lold me so; as well did my symptoms, for they were truly alarming; and I felt fully convinced, that unless relief was obtained, I must soon be consigned to the narrow confines of the silent grave. But by the timely use of your remedy, I still live, and again enjoy my forner good health. I had, indeed, diar uir, all the alarming symptoms you speak of as ligning consumption in its worst stage; but by the isse of your Jelly, I again say, I am. cured. the use of your Jelly, I again say, I am, cured.

I have just its price to you as low as lean afford; if you use it, and succeed in curing yourself, I shall have the gratification of having rescued another from consumption; and I hope, in return, that you will not withhold from me your name, and a statement of rour consumption.
